

Sivrin's Interwoven Teamsite Maintenance Service

Objective

We provide this service as part of a whole maintenance package for maintaining Teamsite. Under this service we can do user support, minor patches and support deployment of application developed by your own Teamsite Consultants. This way there is someone available as a fall back for a reasonable cost to support your Teamsite implementation.

What we can help

- Support End User
- Work with your external consultants in getting and deploying deliverables
- Assist your IT team / external IT vendors in integrating other enterprise data / application with your Teamsite application.
- Backup / Restore
- Access Security Maintenance
- Fallback for your internal resources
- Remote Support for Teamsite

Our Assurance

- Quality Support
- Available to you all the time
- Service Level Agreement
- Signed Non Disclosure Agreement
